THE MOMO HUT

Understanding Momo Hut: a Neighbourhood CRM Opportunity

A quick-service Indo-Chinese cafe in Basant Gaon, New Delhi — where regulars are known by face, but not yet by data.

WHAT MOMO HUT SERVES

Steamed & Fried Momos

Kurkure / crispy-style variants

Noodles & Fried Rice

Classic Indo-Chinese staples

Chinese Starters

Manchurian, chilli dishes, soups

Combos & Takeaway

Spring rolls, meal bundles

CRM Opportunity Move from informal, memory-based relationships to a simple, structured retention system — without expensive software.

FIELD VISIT 1 • 4 Sep 2026

6:30 – 8:30 PM | Peak-hour observation & staff interaction

- Repeat customers recognised by staff on sight
- Waiting time & seating strained during rush
- Staff prefer a simple loyalty system over complex digital CRM

FIELD VISIT 2 • 6 Sep 2026

1:00 – 3:00 PM | Off-peak observation & customer survey

- Takeaway orders are a major share of activity
- Loyalty rewards viewed positively by regulars
- Product consistency flagged as a key issue

Staff interaction during field visit

80 Customers, One Clear Pattern: Engagement Is Softening

THE PROBLEM ISN'T JUST PRICE

REASONS FOR REDUCED VISITS — STRICT AT-RISK (N = 14)

Each bar shows customers citing the reason; percentages are of 14 strict At-Risk customers.

2.5 / 5

AVERAGE SATISFACTION

8 of 14 strict At-Risk customers rated satisfaction at 1 or 2.

Product Experience is the Biggest Retention Risk

6 customers (42.9%) cited Product / Quality, versus 1 customer (7.1%) citing Price / Affordability. Discounts alone will not solve the retention problem.

PRODUCT QUALITY → SERVICE → CONVENIENCE → REPEAT

THREE MOVES TO WIN CUSTOMERS BACK

01

PERSONALISED COMEBACK OFFER

OBJECTIVE

Re-engage customers who have stopped or reduced visiting.

PURPOSE

Trigger reactivation using relevant personalised communication and offers.

Use a relevant food-led message, not a blanket discount.

02

LOYALTY STAMP CARD

OBJECTIVE

Create a repeat-visit habit: VISIT → STAMP → REWARD.

THE MOMO HUT LOYALTY

03

FREQUENCY RECOVERY CHALLENGE

OBJECTIVE

Recover lost visit frequency: 1 visit → 2 visits → 3 visits → reward.

FOCUS

Build habit recovery rather than discount dependency.

MEASURE

IMPROVE

MAKE THE RETURN TANGIBLE

Use real menu items and convenient offers to connect the CRM message to the next meal occasion.

WEEK 1

Identify & Segment

- Analyse customer data
- Identify strict At-Risk
- Prioritise target list

WEEK 2

Re-Engage

- Launch personalised comeback communication
- Use relevant offers

WEEK 3

Reward & Build Habit

- Introduce loyalty stamp card
- Run frequency recovery challenge

WEEK 4

Measure & Optimise

- Track repeat visits
- Track offer redemption
- Track satisfaction & recovery

"Customers showed positive interest in simple loyalty rewards and convenient offers."

RETENTION IS THE REAL REVENUE LEVER

ACADEMIC / ILLUSTRATIVE PROJECTION — NOT ACTUAL BUSINESS RESULT

Strict At-Risk customers	14
Retention assumption	× 30%
Illustrative retained customers	≈ 4.2
Additional visits per retained customer	× 2
Average spend per visit	× ₹312

₹2,621

ILLUSTRATIVE INCREMENTAL VALUE / MONTH

Calculation: $14 \times 30\% \approx 4.2$ retained customers; 4.2×2 visits $\times$ ₹312 $\approx$ ₹2,621/month. This is an academic scenario, not a measured business outcome.
